Production Incident Management & Escalation Playbook

Document ID: SOP-OPS-2026-11 | **Owner:** Site Reliability Engineering | **Date:** 18 February 2026

Incident Severities

Severity 1 (Critical): Total service outage impacting >15% of active users. Severity 2 (Major): Core feature degradation with no immediate workaround. Severity 3 (Minor): Non-blocking operational issue.

SLA & Response Times

Sev-1 incidents require incident commander assignment within 5 minutes and an executive status page update within 15 minutes. Sev-2 incidents require response within 30 minutes.

War Room Protocol

The primary Incident Commander (IC) owns communication and delegation. Engineers must not execute ad-hoc production changes without IC logging.

Post-Mortem Requirements

A blameless post-mortem must be scheduled within 72 hours of incident resolution for all Sev-1 and Sev-2 events. Action items must be logged in the engineering backlog within 5 business days.
